

Hey, hi,
and hello!

PROFILE

I am an award-winning web architect, designer, developer, maker, data journalist and entrepreneur from India. I help people build great products. I'm currently working as tech consultant at Evidence for Policy Design at the Center for International Development, Harvard University, where we build tools that enable governments to make data driven policy decisions.

I specialise in designing minimal & stunning interfaces, data visualizations, writing scalable and high performance CSS, front-end architecture, JavaScript, Node, Python.
